Bjarne E. Ytterhus

Department

Economics

Term

According to study plan

ECTS Credits

6

This is a practical tools based course aimed at equipping students with the skills to deal with the environmental performance of a business. It is intended for those who might be involved in environmental issues in future careers or have a general interest in issues associated with business and the environment.

Objective

The course will involve formal input relating to the tools of corporate environmental management as well as an emphasis on practical case studies, group assignments and simulation exercises.

Prerequisites

Compulsory literature

Welford, Richard, ed. 1998. *Corporate Environmental Management: 1, Systems and Strategies*. 2nd ed. London: Earthscan Publ.
Relevant articles.

Recommended literature
