

APPLIES TO ACADEMIC YEAR 2005/2006

GRA 4342 Shipping Management 2

Program

Bachelor of Science in Business (3. year).

Responsible for the course

Cathrine Bjune

Department

Accounting - Auditing and Law

Term

According to study plan

ECTS Credits

6

This course (in combination with GRA 4341) offers a thorough introduction to the development, practice and economics of international shipping. It aims at students who wish to specialise in the management of shipping companies, work in shipbroking or with consultants, finance and insurance organisations that include shipping in their portfolios. The courses also facilitate entry into management positions in those sectors of international commerce, industry and civil service that are prime users of maritime services. The courses are designed as electives to be chosen in combination with specialisations such as finance, logistics, project management, enterprise development and so on.

Objective

The course will provide an understanding of commercial practices and the legislative and contractual framework of international shipping. Students will be able to:

- describe the main issues of chartering practice;
- describe the most important forms of maritime freight agreements, distribution of risk and liability, as well as payment mechanisms;
- relate to central issues of maritime law and insurance;
- relate to international agreements on maritime safety and environmental protection;
- describe the central issues of international shipping policy and its dependence on trade policy and economic blocs;
- understand international shipping policy;
- understand international environmental policy related to shipping.

Prerequisites

None

Compulsory literature

Books:

Falkanger, Thor og Hans Jacob Bull. 2004. Innføring i sjørett. 6. utg.. Oslo: Sjørettsfondet

Recommended literature
