

APPLIES TO ACADEMIC YEAR 2006/2007

EMS 8950 Basic Financial Management

Program

Bachelor in Real Estate (2. year)

Responsible for the course

Dag Michalsen

Department

Financial Economics

Term

According to study plan

ECTS Credits

6

Objective

The main objective of the course is to provide students with basic insight into the theoretical and practical aspects of the capital budgeting decisions made by the firm. With respect to capital budgeting, this implies that in addition to a careful discussion of traditional decision-making rules like net present value and internal rate of return, considerable emphasis is placed on capital budgeting under uncertainty, including portfolio theory and risk and return. The financing decisions are dealt with more pragmatically, emphasizing the cost of capital for different sources of long-term financing, as well as estimating the overall cost of capital for the firm.

Prerequisites

The course is based on knowledge acquired in the statistics course of the Foundation Program in Business Administration or similar. The part-time course option also requires knowledge corresponding to the courses in Managerial Accounting. Full-time students need to keep themselves up to date with the progression of the courses in Managerial Accounting.
