What is the relationship between accounting information and economic realities? This course provides insight into the fundamental functions of financial reporting and its theoretical basis.

Learning outcome

The course aims to provide insights into the connections between the accounting information of enterprises and their surroundings. We will discuss how the accounts reflect the financial conditions of the enterprises that prepare them, and also study how accounting information from these enterprises affects the companies' environment. The course provides a background for understanding the contents of accounting standards, to enable the students to apply and analyse accounting data correctly, and gain an insight into how accounting information is used by financial statement users (in particular investors) and what conclusions may be drawn as regards appropriate accounting regulations. The course also covers the history of accounting, the reasons for public regulation of financial reporting and international comparisons.

Honor code

Academic honesty and trust are important to all of us as individuals, and represent values that are encouraged and promoted by the honor code system. This is a most significant university tradition. Students are responsible for familiarizing themselves with the ideals of the honor code system, to which the faculty are also deeply committed.

Any violation of the honor code will be dealt with in accordance with BI's procedures for cheating. These issues are a serious matter to everyone associated with the programs at BI and are at the heart of the honor code and academy integrity. If you have any questions about your responsibilities under the honor code, please ask.
