ECTS Credits

7,5

Language of instruction

English

Introduction

This course offers an introduction to marine insurance as well as the development, practice and legal framework of international shipping. The course explains the insurance covers available to owners, charterers and third parties in the Norwegian and English markets. The connection between law and insurance is covered. The course offers an understanding of International Maritime Law, International Conventions and its impact on international shipping. The course also covers an introduction to commonly used contracts and documents. In addition, the students will learn about the owners insurable interests in the vessel, the international insurance markets and covers available. The course is designed for the authorisation program for marine insurance brokers, but is also useful to all working or wanting to work in the shipping industry as such.

Objective

The objective of the course is to provide an understanding of commercial practices as well as the legislative and contractual framework of international shipping and how it impacts insurance covers and marine insurance. The students will be able to identify liabilities in contract and in tort, determine jurisdiction and applicable law, and decide on relevant insurance covers. The students will understand the owner's capital and income interests in his vessel as well as being able to identify and assess potential legal liabilities in contract and in tort.

Prerequisites

None.
