Term

According to study plan

ECTS Credits

6

Language of instruction

English

Introduction

This course is designed to provide an introduction to the area of interorganizational relationships in marketing. It will identify, review, evaluate and critique a variety of topics in the area of interorganizational relationships.

The area of interorganizational relationships is rapidly becoming a broad field of study, and it is impossible to cover every topic and perspective in a single course. An attempt will be made to provide an introduction to some of the main theoretical paradigms in the area. Considerable emphasis will also be placed on strategies for conducting empirical research on interorganizational relationships.

Learning outcome

The major objectives are to help students:

- (1) become a more sophisticated consumer of interorganizational research
- (2) understand the methods and perspectives employed in the area, and
- (3) identify areas for future research activity.

While we will draw on a number of different streams of work, the course is organized around my idiosyncratic perspective of interorganizational relationships. This course is not intended to be a comprehensive review of the literature. I have purposely restricted the required reading list to a very limited number of papers in order to dig deeply into each paper. For students who are pursuing the interorganizational relationships area as an avenue for research, and for future reference, an extensive list of recommended readings will be provided.

Prerequisites

GRA6023 Research Methodology/GRA6034 Research Methodology for Marketing and GRA6020 Multivariate Statistics/GRA6036 Multivariate Statistics with econometrics, or equivalent courses.

It is assumed that every student is familiar with the general principles of research design, measurement, and multivariate statistical analysis.

Compulsory reading

Other:

During the course there may be hand-outs and other material on additional topics relevant for the course and the examination.

Selected articles from e.g., Journal of Marketing, Journal of Marketing Research, Journal of Consumer Research, Marketing Science, Administrative Science Quarterly, Academy of Management Journal, Academy of Management Review, Management Science, American Journal of Sociology, American Sociological Review, Journal of Law, Economics and Organization, Journal of Law and Economics, Journal of Financial Economics, Bell Journal of Economics, Managerial and Decision Economics, as well as a selection of book chapters.

Recommended reading

Course outline

- Introduction to interorganizational relationships
- Methodological issues
- Theoretical paradigms
- Applications to marketing

A detailed schedule with specific course topics will be distributed during the first meeting.

Computer-based tools

None

Learning process and workload

A set of required readings will be assigned for each meeting. Students are expected to thoroughly read and analyze all of the required readings prior to each meeting. Articles may be added during the semester. My own style is to combine some lecture time with discussion time. For each meeting, I will ask two students to prepare discussion questions for specific readings. Depending on the number of course participants students may be asked to prepare discussion questions for more than one meeting.

A maximum of five questions should be developed to address key issues discussed in each of the assigned readings and could seek to integrate the assigned readings with other topics covered in prior meetings.

A copy of the questions should be distributed to each of the course participants prior to the meeting (TBD). The discussion leader(s) will have the responsibilities of leading the discussion and summarizing and synthesizing the articles with some brief closing remarks.

To a large extent, the value of this course will depend on the students' level of preparation and participation in the discussion. Course credit will be given based on quality of class participation and a term paper (see Evaluation below). Sheer quantity of comments, with little depth or relevance to the focal issues, will not be rewarded (although presumably not punished).

If students have to miss class on a particular day, it is the students' responsibility to get notes from a classmate. Let me know as soon as possible if you have to miss a class.

During the semester, if students experience any problem(s) with the class or any of the classmates I expect the students to report any problem(s) that they are not able to resolve themselves to me as soon as possible.

In this course class attendance is mandatory. Unexcused absence can result in a lower grade.

Please note that while attendance is not compulsory in all courses, it is the student's own responsibility to obtain any information provided in class that is not included on the course homepage/Blackboard or text book.

Examination

The course grade will be determined on the following basis:

- 40% - Course participation, including written reviews
- 40% - Term paper
- 20% - Presentation of paper idea and presentation of term paper

All parts of the evaluation must be passed in order to get a grade in the course.

Students will be required to write a term paper for the course. The paper should be original work, and be written specifically for this course. An overview of the paper idea/abstract (max 3 pages) is due approx. two-thirds into the course (TBD). The abstract should focus on what the students are proposing to do (versus what others have done or literature review.) Each participant will then present the research idea and receive comments from the other participants. To ensure an active discussion, each participant will be assigned two abstracts for written comments.

The written comments on the abstracts are due approx. 3 days after the abstracts are submitted (TBD). The comments are confidential and will only be shared with the author. The objective of the reviews is to be helpful to the author - not to be judgmental (i.e., this should not be a review listing pages of inadequacies.) Please follow the tradition of JCR's first editor (Bob Ferber), who felt that the "outside" reviewers' role is to see if the basic idea makes sense and whether it can be understood by an intelligent reader not in the author's immediate circle of friends, co-authors, etc. The purpose of this is to improve the translation and dissemination of knowledge.

The final paper is due on the last day of class. No incompletes will be given. The specific format for this paper will be provided in class.

Specific information regarding student evaluation beyond the information given in the course description will be provided in class. This information may be relevant for requirements for term papers or other hand-ins, and/or where class participation can be one of several elements of the overall evaluation.

Exam code(s)

GRA 64361 accounts for 100% of the final grade in the course GRA 6436.

Examination support materials

Support materials at written examinations are explained under exam information in our web-based student handbook. Please note use of calculator and dictionary.
<http://www.bi.no/studenthandbook>.

Re-sit examination

Re-takes are only possible at the next time a course will be held. When course evaluation consists of class participation or process elements, the whole course must be re-evaluated when a student wants to retake an exam. Retake examinations entail an extra examination fee.

Additional information

Honor Code

Academic honesty and trust are important to all of us as individuals, and represent values that are encouraged and promoted by the honor code system. This is a most significant university tradition. Students are responsible for familiarizing themselves with the ideals of the honor code system, to which the faculty are also deeply committed.

Any violation of the honor code will be dealt with in accordance with BI's procedures for cheating. These issues are a serious matter to everyone associated with the programs at BI and are at the heart of the honor code and academy integrity. If you have any questions about your responsibilities under the honor code, please ask.
