Course outline

Introduction to taxation, ordinary income and personal income.

1. Tax regulations regarding inventory, accounts receivable, depreciation, and profits and losses
2. Computation of deferred tax
3. Computation of deferred tax in financial accounting and tax accounting
4. Cash flow statements

Computer-based tools

Computer-based tools will not be used in teaching. Students can independently use software to compute tax. Similarly, students can independently use financial accounting software to solve the case. It might be useful to utilize the Norwegian Electronic Tax Library to discuss taxation exercises.

Course structure

The course duration is 42 hours. Students cannot expect that all subjects will be discussed in detail during the lectures. They are therefore required to make a considerable personal effort.

Examination

A three hour individual written exam concludes the course.

The examination will be based on a case which is given to the students approximately one month ahead of the examination. The students will solve this case on their own, and bring it with them to the examination. The questions at the examination will partly be based on the facts and data from the case and the solution of the case, and partly on subjects that have not been discussed in the case. The solution of the case itself will not be graded.

Examination code(s)

EMS 22231 - Written exam, which accounts for 100% of the grade in EMS 2223 Accounting and Taxation in Real Estate, 6 ECTS credits.
