Introduction

Objective

The main goal is to give an introduction to macroeconomics so that participants are able to understand and address important issues related to the macroeconomy and economic policy in Norway and other industrialised countries. In particular, the course aims at

- explaining the most important concepts and relationships in the income and product accounts (national accounts)
- explaining the fundamental difference between the real economy on the one hand, and the monetary system and nominal variables on the other
- giving an introduction to theories of economic growth, macroeconomic fluctuations (business cycles), unemployment, interest rates, exchange rates, and inflation
- explaining how fiscal and monetary policies affect the macroeconomy in a small open economies.

Prerequisites

No particular prerequisites are required.
