Master of Science in International Marketing and Management, Master of Science in Political Economy, Specialization Course

Responsible for the course

Anne Welle-Strand

Department

Department of Leadership and Organizational Behaviour

Term

According to study plan

ECTS Credits

6

Language of instruction

English

Introduction

The dynamics of development and knowledge of what affects it, is becoming crucial for handling an increasingly complex environment in an ever more globalized world. This course presents central topics in development studies in a theoretical framework, combined with practical case studies at home and abroad.

Learning outcome

This course provides an overview of central topics in international development. It will provide students with theoretical frameworks for analyzing multi-level development issues as well as practical knowledge of the actual challenges and opportunities. The course attempts to answer, among others, the following questions:

- Why are some countries rich and some are poor?
- How does one define development and what affects it?
- What is the relative comparative impact of different types of interactions between poor and rich countries in the form of remittance, trade, aid, foreign direct investments and microfinance?
- What is the role of business in international development?
- How do different channels of aid and transfers differ in nature and impact?
- What is the role of political systems, institutions, resources and geography on development?
- What is the role of competence in development aid and international business in relation to development?

The course is designed to enhance the students' ability to critically assess political, economic and management issues surrounding international development. In order to address the practical aspects of this, one or more of the sessions will be held during a voluntary excursion to a developing country.

Prerequisites

Microeconomics (GRA6031 or GRA6037 or eq.), foundation courses in strategy and/or political economy or eq.

Compulsory reading

Books:

Collier, Paul. 2007. The bottom billion : why the poorest countries are failing and what can be done about it. Oxford University Press

Collection of articles:

Compendium of Journal Articles, including articles/chapters.

Other:

During the course there may be hand-outs and other material on additional topics relevant for the course and the examination.

Course outline

1. Development: How is it defined and what affects it. Historical, philosophical, economic and political explanations for the division between the rich and poor countries.
2. Foreign Direct Investments: How can it enhance development, what is its limitations and challenges, how should it be managed and what are critical criteria for success?
3. Political and economic systems: How are they related to a nation's development?
4. Trade: Is it a positive-sum game or an exploitative mechanism? Liberal, realist and Marxist perspectives on trade and exploration of empirical evidence of its impact on development.
5. Aid: Historical overview and an exploration of the positive and negative effects of traditional development aid with an emphasis on the Norwegian case. Have we succeeded?
6. Microfinance: What kind of institutions and other preconditions must be in place to develop the concept of microfinance further and is it really helping the poor?
7. Evaluation and measurement: What methodological concerns will one encounter when studying and evaluating development aid? What is the rationale behind evaluation of the field? Education as development.

Learning process and workload

A course of 6 ECTS credits corresponds to a workload of 160-180 hours.

The course will be run with lectures, which may include a study trip to a developing country. Participation in the study trip is not mandatory. The destination will be decided at a later stage, but will be a country where the interactions between business, government and civil society is clearly visible and to where MICRO and BI have good connections to government, organizations, corporations and educational institutions.

Please note that class attendance is compulsory. It is the student's own responsibility to obtain any information provided in class that is not included on the course homepage/It's learning or text book.

Examination

Your course grade will be based on the following activities and weights:

70 % of the grade will be based on a term paper (written by one or two students)

30% of the grade will be based on in-class participation, presentations and discussions

All parts of the evaluation must be passed in order to obtain a grade in the course.

Specific information regarding student evaluation beyond the information given in the course description will be provided in class. This information may be relevant for requirements for term papers or other hand-ins, and/or where class participation can be one of several elements of the overall evaluation.

This is a course with continuous assessment (several exam elements) and one final exam code. Each exam element will be graded using points on a scale (e.g. 0-100). The elements will be weighted together according to the information in the course description in order to calculate the final letter grade for the course. You will find detailed information about the point system and the cut off points with reference to the letter grades on the course site in It's learning.

Examination code(s)

GRA 59231 accounts for 100% of the final grade GRA 5923.

Examination support materials

Exam aids at written examinations are explained under exam information in our web-based Student handbook. Please note use of calculator and dictionary.

<http://www.bi.edu/studenthandbook/examaids>

Re-sit examination

It is only possible to retake an examination when the course is next taught.

The assessment in some courses is based on more than one exam code.

Where this is the case, you may retake only the assessed components of one of these exam codes.

Where this is not the case, all of the assessed components of the course must be retaken.

All retaken examinations will incur an additional fee.

Additional information

Honor Code

Academic honesty and trust are important to all of us as individuals, and represent values that are encouraged and promoted by the honor code system. This is a most significant university tradition. Students are responsible for familiarizing themselves with the ideals of the honor code system, to which the faculty are also deeply committed.

Any violation of the honor code will be dealt with in accordance with BI's procedures for cheating. These issues are a serious matter to everyone associated with the programs at BI and are at the heart of the honor code and academic integrity. If you have any questions about your responsibilities under the honor code, please ask.
