Programme

Re-sit examination

Responsible for the course

Audun Molde

Department

Department of Communication - Culture and Languages

Term

According to study plan

ECTS Credits

6

Language of instruction

Norwegian

Introduction

The recorded music industry is a young industry strongly attached to the genre of popular music. Popular music represent the major part of the industry's turnover. The majors Universal, Warner, SonyBMG and EMI represent about 80 % of the total market for recorded music. The many small and medium-sized record companies are called "indies" and operate differently from the majors. Recorded music has traditionally been distributed via radio and record stores, but the technological development has given the industry new opportunities and challenges. The industry is characterized by poor cultural policy conditions.

Objective

The aim of the course is to give the students an understanding of how the music industry works, and also to give them the ability to analyze problems in the industry. After completed studies, the students should be able to function as marketers or leaders in the music industry, or as competent representatives for the industry's collaborators.

Prerequisites

There are no claims for special requirements.

Compulsory reading

Books:

Dalchow, Jørn. 2004. Hjelp, jeg er i popbransjen!. Oslo : Norsk musikkråd. Utvalgte sider
