Introduction

The course presents steps from the analysis of the current situation to implementation of strategies, og emphasises practical applications of strategy

Objective

The objective is to teach students to carry out a strategic analysis and develop suggestions for implementation of strategies for companies in retailing, banking, and the consumer service sectors. There are more persons employed in these sectors in Norway today than in Norwegian manufacturing companies. Many of the retailing and consumer service companies do not develop new, clear strategies or suggestions for implementation of strategies. In this course we train students to produce strategic plans by studying theories as well as day-to-day business development in companies in the distributive trades.
