Introduction

Objective

This course is a second course in Microeconomics which discusses topics not covered in the introductory course in the second semester. The first topic is the study of markets with imperfect competition, like monopoly, oligopoly and monopolistic competition. Modern game theory and the theory of behavior under uncertainty are developed as a background for these themes. There is further on a discussion of the optimality properties of a market of perfect competition, with particular emphasis on questions of efficiency and various ethical norms to enable us to evaluate distributal questions. The concept of market failure plays a central role in the course; in the sense that an extended discussion of various forms of market failure serves as a background to understand the need for public interventions in an economy. The course ends with some themes from applied microeconomics, like economics of taxation, cost-benefit analysis and environmental economics.

Prerequisites

Economics I

Compulsory reading

Books:

Grønn, Erik. 2008. Anvendt mikroøkonomi. 2. utg. Oslo: Cappelen akademisk. (Utvalgte deler)
Pindyck, Robert S. and Daniel L. Rubinfeld. 2009. Microeconomics. 7th ed. Upper Saddle River, N.J.: Pearson Prentice Hall. (Utvalgte deler fra Part 3 og Part 4 - Boken brukes også i Samfunnsøkonomi I)

Recommended reading

Course outline

- Monopoly: The solution, efficiency loss, measures against monopoly, price discrimination.
