Introduction

Objective

To understand how international economic integration generates new business opportunities and risk for national as well as international firms. The international dimension extends the field of corporate finance into currency and interest rate risk topics based on deviations from the purchasing power and interest rate parity theorems. A key objective is to be able to distinguish between the concepts of currency exposure and risk at the corporate level.

Prerequisites

Basic courses in investments theory. Students are also required to having successfully completed the progression of courses in the Bachelor Finance program during the second year and the fall-term of the third year.
