

APPLIES TO ACADEMIC YEAR 2012/2013

BIK 2902 Logistics and Marketing channel

Programme

Single courses

Responsible for the course

Eirill Bø

Department

Department of Strategy and Logistics

Term

According to study plan

ECTS Credits

7,5

Language of instruction

Norwegian

Introduction

Logistics and Marketing Channels deals with the physical and administrative processes related to purchasing, handling, storage, transport and delivery of manufactured goods, raw materials and equipment, and discusses how goods and services are made available to the end users. To succeed in a market, a company needs to understand how the marketing channel may be improved and streamlined and how the products can reach the customer efficiently. The marketing channel undergoes continual adjustments due to circumstances such as mergers and purchasing, changes in the company's environment, a higher degree of internationalisation, new concepts and formats and the use of new technology. It is becoming more and more important for the players in the marketing channel to carry out their tasks in such a way that the customers receive the right degree of service.

Logistical processes relate to many of the traditional functions within a company and comprise suppliers as well as customers. The way these processes are conducted determines competitiveness as well as profitability. As a discipline, logistics has developed from a situation where the main focus was on reducing costs in individual areas, to a consideration of the overall picture that emerges through integration within the company and through cooperation with suppliers and customers.

The subjects of logistics and marketing are closely related, and this course looks at the challenges from the point of view of both disciplines. To put it simply, the logistics part of the course describes the physical flow of the goods, and the marketing part shows how to encourage the demand. The relationship between the two disciplines is also emphasised.

Learning outcome

Knowledge outcomes:

By the end of the course the student will have gained a basic insight into the current concept of logistics and how it has developed, plus an understanding of strategic and management challenges for marketing channels in general and retailers in particular.

- * Have an understanding of the concepts of logistics, supply chain management and marketing channels.
- * Know models like Du Pont, total cost analysis, ABC analyses and classification models.
- * Some of the concepts the student should be able to explain:
 - Delivery service
 - Logistics cost
 - Supplier relations
 - Strategic alliances
 - Shop management

Skills outcomes:

By the end of the course the student will be able to explain how, with a customer focus and a market orientation, one can combine economic, social and political perspectives to analyse marketing channels and the physical flow of goods.

The students will be able to:

- * Conduct a distribution analysis to find the most effective channels from the manufacturer to the end user.
- * Conduct a supplier analysis and know how one can make a purchase as efficiently as possible and how one can and should establish a close relationship with the individual supplier.
- * Conduct a stock analysis and draw up production plans for a manufacturing company.
- * Assess what is the right and most cost-efficient delivery service between the different parts of the supply

chain.

Values/attitudes outcomes:

By the end of the course the students will be aware of the fact that effective channels of distribution may conflict with the aim of protecting the environment. They should also develop an awareness of the ethics involved in buying from suppliers.

Prerequisites

None

Compulsory reading

Books:

Gripsrud, Geir, Arne Nygaard. 2005. Markedsføringskanaler. 4. utg. Cappelen akademisk forlag

Persson, Göran og Helge Virum, red. 2011. Logistikk og ledelse av forsyningskjeder. 2. utg. Gyldendal akademisk. 463 sider

Recommended reading

Course outline

Marketing channels:

1. Marketing channels as a subject area – Historical perspective, theory and practice
2. The marketing channel's different service levels and market coverage
3. Functions of the marketing channel and the roles of each player
