Learning process and workload

The course is taught through 40 lectures during one semester. The program is conducted through 40 hours of lectures in one semester. Besides lectures, group work will be used to create dialogue and explore certain topics. Lecturers will not cover the whole syllabus. The purpose of the instruction is to point out main topics and delve into certain themes and examples. The teacher will also use cases, tests and questionnaires in order to enhance the personal learning process. Participants are solely responsible for going through the entire syllabus. The course is generally conducted through three assemblies; the first two in two days. Alternatively, the course may be taught as an evening course with 4 hours of evening lectures once a week during one semester.

Examination

The students will be handing in a project paper at the end of the course. They will be working on this paper throughout the course individually or in groups of up to three persons. The topic of the paper may be obtained from one's own place of employment and should focus on aspects connected to selfleadership or superleadership. This will then make the basis for considering efforts to improve personal performance. Project thesis will increase the practical value of the course. The project paper counts for 100 % to pass the course.

Examination code(s)

BIK 34073 Selfleadership - personal effectiveness and team and follower development - Term paper, accounts for 100 % to pass the course BIK 3704, 7,5 credits

Examination support materials

Re-sit examination

Re-sit at the next ordinary exam.
