

APPLIES TO ACADEMIC YEAR 2013/2014

FAK 2618 Personal Injury Claims Handling, part I

Programme

Bachelor of Management, Banking and Insurance, Single courses

Responsible for the course

Kristian Trosdahl

Department

Department of Accounting - Auditing and Law

Term

According to study plan

ECTS Credits

7,5

Language of instruction

Norwegian

Introduction

The course includes an introduction to topics in the act relating to compensation in certain circumstances and social security law related to liability for damages and measure out compensation after personal injuries after motor accidents, occupational injury and disease etc.

Learning outcome

Acquired knowledge

The students shall obtain knowledge about basic key topics of the law of damages and Law on Industrial Injury Insurance and national insurance, and be able to use this knowledge to consider questions about liability for compensation and to calculate correct compensation for personal injury. They shall also know the basic concepts and contributions of the national insurance.

Acquired skills

The students shall be able to discuss whether an injury is included in the normal basis of liability, including for damages caused by motor vehicles. They shall also be able to give an account of the basis of liability for drug injuries and product liability. Further they shall be able to calculate correct compensation for inflicted and future expenses, inflicted and future loss of income, compensation for permanent injury, compensation for the death of a person and compensation for permanent non-economic loss based on the act relating to compensation in certain circumstances act and the act relating to industrial injury insurance with regulations connected to this law.

Reflection

The students shall acquire a conscious attitude to the fact that their professional advice and decisions they make, especially when they decide if an injury is covered by the insurance or not and the claims settlement, might be of great importance for other people than themselves. Advice and claims handling shall be based on respect for the injured party and his or her situation after the injury.

Prerequisites
