Introduction

The effectiveness, profitability, and value of organizations, broadly defined, are dependent upon human competence, interplay, effort, and leadership. This course will thus include important and evidence-based knowledge about human characteristics, processes, and leadership in complex work settings. In line with this, the course will, e.g., cover issues like learning, motivation, perception, how human traits can be organized and how such processes and traits can be associated with e.g., job satisfaction, effort, and productivity. Moreover, the course will provide knowledge on groups and teams, as well as decision-making, problem solving, and creativity. A special emphasis is put on theories of leadership, including leadership and change. Finally and beyond such perspectives, the course will include an introduction to organizational design and culture.

Learning outcome

Acquired knowledge

The students shall acquire basic knowledge about psychological, organizational, and leadership theories relevant for work settings and for further studies in organizational theory and leadership.

Acquired skills

The students shall be able to explain central psychological, organizational, and leadership concepts, processes, and theories and how they relate to efficiency in work settings.

Reflection

The students shall develop an understanding of the *importance* of psychological characteristics and processes, and organizational conditions for optimal functioning in work settings.

Prerequisites

None.
