Communication in teams

Team creativity

Virtual teams

Leadership theories – Transactional leadership, transformational leadership, self leadership / super leadership, and situational leadership

What does the effective team leader do?

Computer-based tools

itslearning

Learning process and workload

The course consists of three modules over a semester. Each module consist of two days with lectures. Besides lectures, group work will be used to create dialogue and explore certain topics. Cases, tests and skill training will be used to enhance the learning process. Lecturers will not cover the whole syllabus. The purpose of the instruction is to point out main topics and delve into certain themes and examples. Participants are responsible for going through the entire syllabus.

Examination

The students will be handing in a term paper at the end of the course. They will be working on this paper throughout the course individually or in groups of up to three persons. The topic of the paper may be obtained from one's own place of employment and could explain how teams/one's own team functions (strengths and weaknesses). This will then make the basis for considering efforts to improve the team's performance. The term paper will increase the practical value of the course.

Examination code(s)

BIK 29261 - Term paper; accounts for 100% of the final grade in BIK 2926, 7,5 credits
