Introduction

The Bachelor thesis is a major independent project in which students will demonstrate that they can enter an issue in the Shipping discipline and resolve this in an integrated and effective way. Bachelor thesis is a mandatory part of the programme, and can be written in groups of two or three students. In special cases, a student may be granted to do individual work.

Learning outcome

The objective of the course is to train students to plan and carry out an independent research project within a certain time limit. The result is to be presented as a bachelor thesis that must meet scientific criteria concerning form and content.

Acquired Knowledge

After completed Bachelor Thesis students should have:

- Acquired an understanding of the complexity of shipping business.
- An understanding of the significance of liabilities regarding owning and operating a vessel for the different stakeholders.
- An understanding of transportation modes, know how to operate a port and understand how international logistics work.

Acquired Skills

After completed Bachelor Thesis students should be able to:

- Prepare a written report demonstrating analytical and strategic skills related to commercial, juridical and organizational aspects of the shipping industry.
- Demonstrate skills in evaluating and communicate shipping investment proposals including possible trade off decisions.

Reflection

Students shall be aware of the major role of the shipping industry in world trade and be able to reflect on the trade offs between profitability and environmental issues.

Prerequisites

Students are required to have in-depth knowledge of various subject areas and disciplines within their specialization. They also need to have a basic knowledge of research methods in the social sciences

Compulsory reading

Recommended reading

Course outline

While working on the bachelor thesis, students are expected to develop a deeper insight into their chosen subject area. The students can choose an approach based on practical shipping brokerage, a legal approach based on sources of law or a logistics

approach. The thesis may also be based on a combination of these subject areas.

Computer-based tools

Courses may be offered in the use of statistics programs (SPSS or equivalent software) and in information searches in the library.

Learning process and workload

Students are expected to take an independent approach to this study. It is therefore expected that students prepare their work as the basis for discussion ahead of the seminars.

The student needs to fill in a thesis registration form indicating possible topics/problem area and a thesis advisor is then appointed. Students are entitled to 3 hours of personal guidance by the thesis advisor. The student is responsible for contacting the advisor for personal tutorial.

The course duration is one semester including common lectures, 3 seminars and personal guidance. The student is responsible for contacting the tutor for personal guidance. Students are supposed to be prepared for lectures and seminars, so that they can take active part in class by presenting or hand in material. [Please also refer to the guidelines for writing Bachelor thesis.](#)

Up to three hours of tutoring is offered each group of students collaborating on the same Bachelor thesis. The seminars are mandatory and students not attending and does not participate according to curriculum must be prepared for oral hearing.

Activity	Hours
Participation in public lectures 2 x 8 hour	16
Participation in library information	2
Preparation for seminars	30
Work with submissions	80
Participation in seminars, 3 x 2 hours	6
Working with Bachelor thesis	263
Individual counseling	3
Recommended use of hours in total	400

The project idea and chosen methods must be authorized by the tutor before submitting the Bachelor thesis.

Use of hours
