Department of Communication and Culture

Term

According to study plan

ECTS Credits

30

Language of instruction

Norwegian

Introduction

The increasing professionalization of the cultural industries has created a stronger demand for production managers who do not only understand the technical and artistic processes, but who can also carry these out within a framework of economic and management understanding and knowledge.

This program provides participants with a tailored theoretic fundament in economics, project management and communication, and the theory is applied to a industry-specific context of production management in film, TV and stage productions.

Throughout the program participants work with cases from film, TV and stage productions. Through this work the participants are faced with challenges commonly experienced by production managers so that the theory is directly applied to the specific context of film, TV and stage production.

The program is carried out in collaboration with Nordisk Film & TV, The Norwegian Film and TV Producers' Association, the Association of Norwegian Theatres and Orchestras, the Norwegian Association for Performing Arts and The Private Theatre Producers' Association.

Learning outcome

To develop the participants' knowledge to include:

- to be familiar with key relevant principals for organization and management of projects;
- to be familiar with key relevant principals for costing, budgeting and cost reporting for projects;
- to understand the special circumstances for value creation found in creative industries;
- to be familiar with key relevant principals for negotiations and managing conflicts;
- to be familiar with key standard agreements employed in film, TV and stage productions.

To develop the participants' skills so that they can manage film, TV and stage productions, including:

- the ability to manage a production in a manner that service both creative and economic value;
- the ability to manage unpredictable events in a way that leaves the production as little harmed as possible;
- the ability to cost and budget-adjust a production and use this as a management tool;
- the ability to manage negotiations, contracting and conflict settlement towards creative and administrative staff as well as suppliers;

Finally, through the use of case studies the participants should be trained in evaluating ethical dilemmas commonly found in the creative production processes.

Prerequisites

No particular prerequisites are required to take part in the Bachelor Program, but participants should have a basic understanding of film, TV or stage production.

Computer-based tools

Movie Magic Budgeting and Scheduling Software and its learning

Learning process and workload

The programme is conducted through five course modules, a total of 150 lecturing hours continuing during two semesters. The students for this course is assigned for lectures to each semester; the first semester is named BMP 2904 and the second BMP 2905.

Examination

The students are evaluated through a term paper, counting for 60% av the main grade and an individual written exam, counting for 40 % of the main grade. Both evaluations must be passed to obtain a certificate for the program. The term paper is written in groups of minimum two and maximum four persons.

Examination code(s)

BMP 29031 - written exam; accounts for 40% to pass the course BMP 2903, 30 credits.

BMP 29032 - term paper; accounts for 60% to pass the course BMP 2903, 30 credits.

Both evaluations must be passed to obtain a certificate for the program.

Examination support materials

Simple calculator is allowed for the written exam. Exam aids at written examinations are explained under exam information in our web-based Student handbook @bi. Please note use of calculator and dictionary

Re-sit examination

Re-sit at the next ordinary exam.
