Programme

Bachelor of Management, Banking and Insurance, Single courses

Responsible for the course

Ørnulf Daler

Department

Department of Accounting - Auditing and Law

Term

According to study plan

ECTS Credits

7,5

Language of instruction

Norwegian

Introduction

This course is the basis of the insurance education at BI. It gives an overview of the structure and organization of the Norwegian insurance industry and its importance for the individual and for the society as a whole. Basic introduction to life and general insurance, history and development of the industry, Insurance law, insurance accounting and the associations within the insurance and financial industry.

Learning outcome

Acquired knowledge

The students shall acquire knowledge about central parts of principles and regulations of the Insurance Industry as well as central principles of life- and general insurance. Further, the students shall acquire a good overview of insurance accounting, insurance broking, history and development of the industry and the cooperation of the industry to day.

Acquired skills

The students shall evaluate question about the meaning and practising of the Insurance Contract Act. They should especially be aware of the rights to secure the buyer of Insurance. Further they shall be able to give advice about central general insurance and life insurance products. De skal også kunne redegjøre for spørsmål knyttet til forsikringsregnskap, kapitalforvaltning, forsikringsmegling og samarbeidsorganer innen forsikring i dag.

Reflection

During the course, the students should have acquired a conscious attitude to the fact that their professional choices and advice first and foremost are of importance for other people than themselves.

Prerequisites

None

Compulsory reading
