Introduction

This is an introductory international political economy course and requires no previous knowledge. It has been designed for the 'Minor in Political Economy' specialization. The central focus is on global politics and international trade, the processes of globalization that drive change in international political economy, and international organizations and regimes designed to manage international trade and the world economy. The course includes case studies of world trade, and sectors such as energy and information technology.

Learning outcome

The course addresses international developments since the end of the Cold War – more specifically trends and patterns related to democratisation, economic growth and trade as well as stability or change in international relations. It covers theories of international relations, and addresses the great questions of international political economy, including the 'end of history' thesis, the relationship between democracy and economic growth/stability, developments in world trade and efforts to build sustainable international institution to regulate this.

The course also addresses the EU's external relations, including some focus on Norway's relationship with the EU and international free trade regimes. It is designed to provide students with tools and frameworks for analysing current debates and controversies related to the widening of the EU and the EU's relationship with Norway and the rest of the world through organisations such as the WTO, as well as the current debates on the design and operation of international organisations such as the institutions that have been established to liberalise (GATT) and manage (WTO) world trade or issues such as climate change (Kyoto). Institutional design of other international organisations related to democracy, security and human rights are also addressed.

Prerequisites

All courses in the Masters programme will assume that students have fulfilled the admission requirements for the programme. In addition, courses in second, third and/or fourth semester can have specific prerequisites and will assume that students have followed normal study progression. For double degree and exchange students, please note that equivalent courses are accepted.

Compulsory reading

Books:

Baylis, John, Steve Smith and Patricia Owens, eds. 2014. The Globalization of world politics : an introduction to international relations. 6th ed. Oxford University Press

Dicken, Peter. 2015. Global shift : mapping the changing contours of the world economy. 7th ed. Sage

Other:

A list of compulsory readings will be provided on It's learning or in class.

During the course there may be hand-outs and other material on additional topics relevant for the course and the examination.

Not applicable

Learning process and workload

A course of 6 ECTS credits corresponds to a workload of 160-180 hours.
 Please note that while attendance is not compulsory in all courses, it is the student's own responsibility to obtain any information provided in class that is not included on the course homepage/It's learning or text book.

Examination

The course grade will be based on the following activities and weights:

- Presentation 15%
- Assignment 15%
- Term paper 70% - individual

Form of assessment	Weight	Group size
Presentation	15%	
Assignment	15%	
Term paper	70%	Individual

Specific information regarding student assessment will be provided in class. This information may be relevant to requirements for term papers or other hand-ins, and/or where class participation can be one of several components of the overall assessment. This is a course with continuous assessment (several exam components) and one final exam code. Each exam component is graded using points on a scale from 0-100. The final grade for the course is based on the aggregated mark of the course components. Each component is weighted as detailed in the course description. Students who fail to participate in one/some/all exam components will get a lower grade or may fail the course. You will find detailed information about the points system and the mapping scale in the student portal @bi.

Examination code(s)

GRA 59141 continuous assessment accounts for 100 % of the final grade in the course GRA 5914.

Examination support materials

Permitted examination support materials for written examinations are detailed under examination information in the student portal @bi. The section on support materials and the use of calculators and dictionaries should be paid special attention to.

Re-sit examination

It is only possible to retake an examination when the course is next taught. The assessment in some courses is based on more than one exam code. Where this is the case, you may retake only the assessed components of one of these exam codes. All retaken examinations will incur an additional fee. Please note that you need to retake the latest version of the course with updated course literature and assessment. Please make sure that you have familiarised yourself with the latest course description.

Additional information

Honor Code

Academic honesty and trust are important to all of us as individuals, and represent values that are encouraged and promoted by the honor code system. This is a most significant university tradition. Students are responsible for familiarizing themselves with the ideals of the honor code system, to which the faculty are also deeply committed.

Any violation of the honor code will be dealt with in accordance with BI's procedures for cheating. These issues are a serious matter to everyone associated with the programs at BI and are at the heart of the honor code and academic integrity. If you have any questions about your responsibilities under the honor code, please ask.
