Introduction

Real Estate III discusses a number of specialty areas of real estate. The course builds on the Real Estate II with depth in the topics commercial properties and sales of projects. Contract Writing is also a theme in this course. Topics are closely related to the courses Real Estate Law and Settlement of real estate deals.

Learning outcome

Acquired Knowledge

During the course students shall:

- Develop knowledge about the practical consequences of the demands the public, customers, government agencies, real estate business, etc. stand for the exercise of the real estate profession in specific areas, including commercial arbitration and mediation project.
- Based on the law to develop a thorough knowledge of the design of contracts entered into through the estate.

Acquired Skills

After completing the course, students will be able to:

- Solve issues relating to property transactions and after completing the course the student should be able to conduct real estate transactions in project sales and sales of commercial properties.
- Implement transaction and clarify this for settlement. Students will be able to apply the law of the relevant transaction type in practice.
- Manage all document related to the transaction, including the design contracts associated with each transaction.

Reflection

Students will develop the capacity for critical reflection and ethical awareness related to real estate transactions and have an awareness of the legal standards and ethical principles underlying the rules of real estate legislation.

Prerequisites

The course is based on Real Estate Brokerage II

Ekspropriasjon

Computer-based tools

Computer-based tools are not used in this course.

Learning process and workload

The course consists of 40 lecture hours covering the various topics in the syllabus. The lecture plan gives a detailed description of the topics covered.

As part of the teaching programme the students might be divided into small discussion groups and will work on assignments associated with each topic. The assignments will be discussed and reviewed in class after the discussion group work. The lecture form of teaching requires that the students before each lecture have studied the syllabus and the rules of law for the topic in question. The students are required to bring the code of laws and other study aids to the lectures and become familiar with them while studying the various topics. Parts of the syllabus must be studied through self-tuition.

Students will have the opportunity to submit a written work for correction and feedback.

Recommended workload in hours

Activity	Use of hours
Participation in lectures	34
Discussion group work supervised by the lecturer	8
Preparations for lectures	45
Self-tuition / reading syllabus	48
Work on assignments	60
Exam	5
Total recommended use of hours	200

Use of hours

34 hours - Lectures

6 hours - Discussions group work organized by the lecturer

5 hours - Feedback on assignment (Marking is a central process)

45 hours altogether

Examination

A five-hour individual written exam completes the course.
