Introduction

THIS COURSE IS AVAILABLE AS RESIT EXAMINATION ONLY FROM AUTUMN 2016.

Selling is an imperative within all private companies. There is no other single factor in the company that is of higher importance than sales. The "top line" of the company is the "navel string" from which every person and every function in the company is fed. Consequently, sales and sales management have the scrutinizing attention of owners, managers, employees and customers, to build the values promised and get paid for it. High expectations on the sales function and its ability to fulfil company goals whatever happens in the market place and internally.

This course build on the reality of sales being the focus is concerned specifically with the management of business-to-business sales, the management of the sales force and its activities to achieve results.

Accordingly, the desired result is to develop individuals who can take responsibility for their own customer portfolio, influence to sell, build relations, and through a solid understanding of how effective sales are structured, manage a sales organisation and organise one self and others in the endeavour to reach company goals.

Thriving under ever changing market conditions, the sales force must exploit opportunities and constantly rethinking their selling concept. Changes in customer needs, and the resulting recasting of the sales role and sales practices creates a current shift in emphasis of what to focus. Getting close to the best customers and stay there is a "must" in modern sales organisations. The seller needs to be personal accountable for the desired result of the customer, by understanding the customer's business and thereby building relevant customer values. It's necessary to solve problems and still be creative in an international market place where the digital buy is just a "mouse click" away.

It is imperative to the management of the sales force to create a customer-driven culture, recruiting and selecting the right sales talents and train the sales force for the right set of skills. Helped by still more integrated CRM-systems the formal sales processes can be analysed as never before for continuous sales process development and CRM-analysis is a part of the course. The role of IT in sales support and communication is enhanced to ensure knowledge of the customer relationship management dialogue so fundamental when building new customer values.

Learning outcome

Sales representatives and sales managers must face the changes the market is forcing upon them. These large and small variations from former planning and previous behavior, influences sales management actions and the management of sales. Also in the way the selling is planned and organized, on the recruiting, training, motivation and reward of the individual sales person.

Consequentially the superior learning goal of every sales person and every sales manager is to fathom recurring changes and take the right strategic and practical consequences.

Acquired Knowledge

During the course students should:

- Know how to create targeted results, conduct personal selling and develop the sales function within the company, do sales planning in practice, recruit and lead a sales staff.
- Understand what it means, in practice, to sell professionally and how to acquire skills that enable one to act as the seller by profession.
- Know how to establish and develop customer relationships in sales
- Get an insight into sales motivation and sales planning.

Acquired Skills

After completing the course, students will:

- Be able to prepare a sales plan that meets the management of the sales, schedule activity targets and carry out planning of the customer relationship over time.
- Be able to prepare a sales plan, including the planning of the skills needed to work the plan.
- Be able to conduct meetings with industrial sales (B2B) clients.

Reflection

- During the course, the student will understand how indispensable the seller is for the company, and what role an active builder of corporate reputation should play to new and existing customers.
 - A critical and constructive attitude to the concept of sales and sales management is established.
- A sound understanding of the ethical side of personal selling and the management of sales staff will be developed

Prerequisites

All courses in the Masters programme will assume that students have fulfilled the admission requirements for the programme. In addition, courses in second, third and/or fourth semester can have specific prerequisites and will assume that students have followed normal study progression. For double degree and exchange students, please note that equivalent courses are accepted.

Compulsory reading

Books:

Spiro, Rosann L., Gregory A. Rich, William J. Stanton. 2008. Management of a sales force. 12th ed. McGraw-Hill/Irwin

Computer-based tools

Learning process and workload

A course of 6 ECTS credits corresponds to a workload of 160-180 hours.

Please note that while attendance is not compulsory. It is the student's own responsibility to obtain any information provided in class that is not included on the course homepage/It's learning or text book.

The course is structured as a combination of lectures, discussions, in-class activities, and compulsory student presentations. It requires a substantial amount of preparation by the students and active involvement during class.

A number of guest lecturers from sales departments will present their views on the key topics mentioned in point 12 above.

The class will be organized around discussing selected topics illustrated by theory and practical cases. The students are expected to be well prepared and highly involved in the discussions.

Examination

The course grade will be based on the following activities and weights:

Term paper 100 %

Form of assessment	Weight	Group size
Term paper	100%	

Specific information regarding student assessment will be provided in class. This information may be relevant to requirements for term papers or other hand-ins, and/or where class participation can be one of several components of the overall assessment. This is a course with continuous assessment (several exam components) and one final exam code. Each exam component is graded using points on a scale from 0-100. The final grade for the course is based on the aggregated mark of the course components. Each component is weighted as detailed in the course description. Students who fail to participate in one/some/all exam components will get a lower grade or may fail the course. You will find detailed information about the points system and the mapping scale in the student portal @bi. Candidates may be called in for an oral hearing as a verification/control of written assignments.

Examination code(s)

GRA 64411 term paper accounts for 100% of the final grade in the course GRA 6441.

Examination support materials

Not applicable

Permitted examination support materials for written examinations are detailed under examination information in the student portal @bi. The section on support materials and the use of calculators and dictionaries should be paid special attention to.

Re-sit examination

It is only possible to retake an examination when the course is next taught. The assessment in some courses is based on more than one exam code. Where this is the case, you may retake only the assessed components of one of these exam codes. All retaken examinations will incur an additional fee. Please note that you need to retake the latest version of the course with updated course literature and assessment. Please make sure that you have familiarised yourself with the latest course description.

Additional information

Honour code. Academic honesty and trust are important to all of us as individuals, and are values that are integral to BI's honour code system. Students are responsible for familiarising themselves with the honour code system, to which the faculty is deeply committed. Any violation of the honour code will be dealt with in accordance with BI's procedures for academic misconduct. Issues of academic integrity are taken seriously by everyone associated with the programmes at BI and are at the heart of the honour code. If you have any questions about your responsibilities under the honour code, please ask. The learning platform itslearning is used in the teaching of all courses at BI. All students are expected to make use of itslearning.
