Introduction

Learning outcome

knowledge

aims at providing insight and familiarity with general principles of good financial planning, management and performance assessment in the public sector. On completion of the course the students should understand the structure of the municipal and state accounting system, and how this works in practice.

Acquired

The course

Acquired skills

Students should

know and understand public management and public budget work, so that they are able to set up accounts and budgets in the public sector, and make simple analyses.

Reflection

Students will

also be able to see the public sector in an economic perspective, and to reflect on public sector targets compared with the private sector.

Prerequisites

There are no prerequisites, but it is an advantage if you are familiar with the public sector, recognizing the accounting principles in the private sector.
